TERRA SANA CONSULTANTS

STATEMENT OF CAPABILITY

2018

About us.

Terra Sana Consultants Pty Ltd is an Australian owned company providing leading edge consulting services in the field of environment and Health & Safety.
Pursuing innovative solution and technology for the modern world challenges, our highly skilled scientists and consultants are able to provide our customers with high standard of service and cost effective, practical solutions.

Our team.

Our team includes different skillset and levels ranging from staff with extensive industry experience to juniors. Individually they have a specific area of expertise to cater for different project requirements.
We have a comprehensive Competency and Training Plan to assure our team is always up-date with industry requirements.
Highly qualified scientists and consultants can provide the most accurate understanding of complex and uncertain systems.

What we do.

Our qualified and highly specialised field staff can collect samples and perform in-field data analysis in compliance to relevant legislation, guidelines and your company's procedures. We then provide results interpretation to customers. Our pride is to prepare un-biased, scientifically defensible reports.
We serve a number of government agencies and industry sectors including: Oil&Gas, mining exploration, Coal Seam Gas (CSG), quarrying, infrastructures, manufacturing and processing.

Why choose us?

EXPERTISE

Our many years of experience makes us specialised to assist you.
